OCEANIA | NATIONAL BADGE REFERENCE

2026 CANON APPENDIX - preserves the original three-page chart unchanged.

Purpose and interpretation

The badge visually represents the wearer's recognized occupational field and rank. The integrated identity credential can also support approved access, medical alerts, public assistance and government records. Badge appearance alone does not confer unrestricted access, and occupational level does not automatically establish political class or cross-agency command authority.

Original artwork controls

All original triangular shapes, field colors, and five-level progressions remain unchanged. This appendix assigns the EXISTING badge designs; no new or altered insignia have been commissioned. The original standalone PNG files remain the controlling website artwork.

Key usage rules

- Every recognized citizen wears an authorized identification badge on customary clothing or uniform. Exceptional custodial conditions are separately regulated.
- Senior government appointees use Government / Level 4 / Council while serving on the National Directorate; Governor Goldstein uses Government / Grand Level / Governor.
- A formal Acting Governor may receive a temporary executive designation under the approved Executive Continuity Protocol. Margaret Ashcombe is NOT a standing Vice Governor.
- Military specialty and operational titles are distinct from the insignia's rank label. A Skyknight Skymaster award is not itself a standing military grade.
- OSU-field badges identify service authorization, NOT an OSU's legal citizenship or political-party membership. Prisoner-field badges identify detention classification, NOT occupational status.
- Physiological signals provide fallible indicators of health or stress; they cannot establish deception or intent with certainty. Access to person-specific data is differentiated by lawful operational role.

SPECIAL DESIGNATIONS AND EDGE CASES

Chart category	2026 treatment
Government / Vice Governor	Reserved for formal appointment or temporary succession authorization; not a standard standing badge for Ashcombe.
Champions	Existing Champion / Grand Champion art retained; determine actual individual assignments during Champions character review.
OSU	Citizen / Outer Party / Inner Party / Government / Governor designate robot assignment category and authorization, not personal citizenship.
Prisoner	Level 1–4 Detention / Omega Detention are custody designations; not citizenship ranks.
Cross-service command	A branch insignia does not establish command over unrelated agencies (e.g., THINKPOL versus OCSS).

MINISTRY WEBPAGE PRESENTATION STANDARD

Keep one uninterrupted ministry narrative. Show the minister's portrait in a separate leadership feature. Each major agency receives its own navigable webpage section, where its leader profile includes the assigned badge PNG and the organization may have its own image gallery. Link to the original badge chart as the authority for insignia shapes and colors.

Future badge design rule

Do not create a new badge merely because a person has a specialized job title. If an approved future position truly has no existing equivalent, develop one badge at a time, match the source chart's shapes/color system, obtain explicit approval, and deliver its own standalone transparent PNG for the image library.
